Price List **2019**

Celebrating new design

It's 2019 and this is our yet another progressive catalogue. A catalogue with new designs, new products that come from an innovative technology. It's always a great feeling to come with something new before you. Especially when it comes with good experience and progressive impressions.

Since the beginning of the year 2008, our ambition has always been to create technology that not only looks good, but is functional and good value for money. We continue to have our own concepts, production and distribution while working closely with a few, select international suppliers who share our same strong commitment to high quality.

We have come a long way since we began. Now with more than 1,500 dealership stores around the country, we find our inspiration from the urban lifestyle, but our commitment to creating good, honest and useful design remains the same. A commitment that is shared by our dedicated team of product designers, graphic designers, production experts, dispatch team and all those involved in the process of producing a class-apart product that reaches the consumer.

We take this opportunity to say a thank you to all our channel partners and customers spread across the nation. We are committed to listening to you, guide you and always seek the best solution for you. We hope we are able to bring you the finest lifestyle with our products and accessories. Hope turning these pages bring you new inspirations and assurance that our bond of years has been put to good use.

Thank you.

TEAM VANKON

Luxury isn't just about how expensive things are. The element of beauty, its richness and functionality play a collective role. Sometimes luxury is one brilliant idea. That one idea that further helps to create functional products. We at VANKON, understand how important experiences are, and that is what we inculcate in our designs. KRIO is about classic timeless forms to unconventional designs, we find inspiration from everything. We don't ignore the past. We take the best from it and combine it carefully with tomorrow. It wouldn't be right to expect fascinating things from everyday life all the time. However, creating joyful experiences isn't out of our hands and it's the greatest luxury of all.

Touch Switch

Characteristics : Touch switches are designed to control resistive, inductive and capacitive loads in residential and commercial premises, either operated manually (feather touch) or via remote. Super Luxurious in appearance the blue backlit touch keys make it easier and convenient to operate in the dark. The appliance is equipped with micro controller chip to save the parameters preset by the user thereby designed to cater user needs with easy operation.

Glossy : White

Touch Switch

Characteristics : Touch switches are designed to control resistive, inductive and capacitive loads in residential and commercial premises, either operated manually (feather touch) or via remote. Super Luxurious in appearance the blue backlit touch keys make it easier and convenient to operate in the dark. The appliance is equipped with micro controller chip to save the parameters preset by the user thereby designed to cater user needs with easy operation.

Glossy : White, Black, Ivory

SECURE YOUR WORLD

Each electronic accessory is developed with best technology and quality materials and every product is durable and safe. The adaptors are equipped with built-in surge protector that keeps your appliances safe from spikes in the flow of different voltage or frequency. The spike guards have safety shutters providing security while traveling with children. Designed in accordance with the international standards, Our products assure you longevity and utmost protection.

Size Construction / Current Rating and Price Manual

- Application : Wiring in all installation where fire safety is more important. School, theaters, commercial complex, air conditioned apartments, high rise building, fire alarms & emergency lighting circuit
- Specification : Generally conform to IS-694
- Conductor : Thin stands of Electrolytic Copper are multi-drawn simultaneously for uniformity of Resistance, Dimension, and flexibility. the drawn stands are bunched in high precision machines. A circular conductor is thus formed. The conductor is bunched in such a way that it reduces in overall diameter for space saving in high density wiring.
- Insulation : Specially formulated grade a flame Regardant (FR) compound is used. The performance of the cable in a fire situation is exceptionally good. The insulation does not burn readily. It does not melt and drip. The smoke is negligible, transparent, non toxic. The victim trapped in fire do not suffocate and this facilitates fire fighting operations. Unlike general purpose PVC, the smoke emitted is non-corrosive, thus, the printed circuit boards, & other sensitive electronic equipment are unaffected.
- Marking :
- Colors : Red ■ Yellow ■ Blue ■ Black ■ Green ■ White □

FR-FLAME RETARDANT

Absolute **Safety** ...

Engaging **Thoughts** With **Love**.....

The power that do not disturb the dreams that are seen by your children..... are here. It enables the room to take on a relaxing feel and help you wind down after a hard day. The power light up the ambience with softness and serenity with a touch of love and affection that do not hurt the eyes of your loved ones, when asleep and wake up to freshness...

Switchgear & Protection Devices

SILVER LINE
"B" SERIES MCB'S

An ISO 9001:2015 Certified Company

VANKON
Switchgear & Protection Devices

SILVER LINE
"B" SERIES MCB'S

MCB's

Miniature Circuit Breakers are Electro Mechanical Device which Protect an Electric Circuit from an over current

GOLD LINE
"C" SERIES MCB'S

BUILT to Perfection and designed to ensure efficiency and protection providing uncompromising safety.

Safety is not an option. That is precisely why it becomes the most important constituent in making of VANKON Switchgear & Protection Devices such as MCBs, RCCBs & DBs. With utmost prominence to the ergonomics,

RESIDUAL CURRENT CIRCUIT BREAKER

RCCB means Residual Current Circuit Breaker -- A residual current device (RCD), or residual current circuit breaker (RCCB), is an electrical wiring device that disconnects a circuit whenever it detects that the electric current is not balanced between the phase ("hot") conductor

VANKON Distribution Boards blend aesthetics, functionality and safety together. The Distribution Boards are manufactured with high precision and supreme quality metal sheets that also ensure anti-rust conditioning providing a long lasting strength. The DBs ensure easy installation with sturdy wall mounting cabinets for surface mounting, flush, or partly recessed applications. Streamlined design, stylish colour and impeccable protection in single or a double door option provide shelter for domestic or small commercial installations.
